

A STEP TOWARD THE FUTURE

THANKS TO DIGGER DTR'S TECHNOLOGIES

**EUREKAB
REMOTE CONTROL
IN COMPLETE COMFORT**

One operating station equipped with joysticks and pedals.

Optional: two independent operating stations.

Customisable screens permitting ergonomic views of the cameras and machine parameters.

In addition to the screens, a stereoscopic view through a VR headset allows precision operations to be performed as if you were in the machine.

Optional: the cabin can be supplied on a road trailer fitted with stabilisers for levelling.

The cabin can be moved using a forklift truck. Lifting points also allow the cabin to be moved by crane.

A 16A three-phase electrical connection provides power to all the equipment in the cabin.

Choice of connector depending on the country of use.

A back-up generator can be provided to ensure minimum control functionality.

A heater/air-conditioner ensures a comfortable operating temperature in all weathers.

A small refrigerator, DAB+ radio, cup holders, USB chargers, interior lighting and windscreen wipers provided for the comfort and safety of the operator.
